MID-CONTINENT AIRCRAFT INSURANCE DIVISION

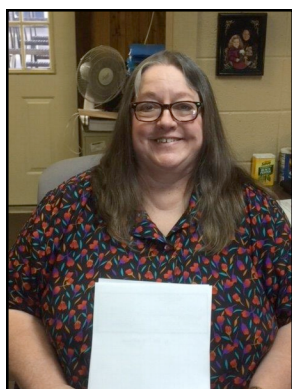

We Know Your Business

Sharon Watkins
*Insurance Manager/
Producer*

It takes more than insurance knowledge to provide proper aviation coverage in this very specialized field. Our insurance agency is just one part of a full service aviation center with over 68 years of experience. We have the knowledge and experience of the entire MCAC Team. This knowledge works for you as it keeps us in tune with the industry and gives us an insight that you seldom find in other agencies.

As Insurance Brokers we have access to all available markets. This enables us to provide you with the coverage you need at competitive rates and with service that is unmatched in the industry. Please complete and return the Quotation Request which you can download from our web site for a no obligation proposal on your coverage within 30 days of your expiration date. If you are short on time, call us at 800-325-0885 and we will expedite your quote.

**We're On The Web
www.midcont.com**

**All In One air portable/carry-on START PAC®
with built in chargers, power plug and cables.**

- 26 AMP hours @ 10 Hour Rate
- 2300 AMPS Peak Current
- Available with separate trolley
- 19.2"x7.5"x11.5"
- 77 LBS. Complete

Units are 28.5 VDC output, with universal chargers that will accept 90-240VAC 50/60 hertz.

The new patent pending Start Pac® 6028QC has a separate removable battery that can be changed in 15 seconds. This feature allows the user to change batteries in the field without needing to send the Start Pac® back to the shop or Manufacturer.

This 28.5-volt unit will start the largest electrically started turbine or piston engines including the Garrett TPE331. This Start Pac will provide a faster and cooler start than most ship's aircraft batteries, thus increasing turbine life. Various maintenance duties can be performed with this pack that requires more than 24 volts for checkout. This unit has dual redundant chargers with a total of 7 amps output with a recharge time of approximately 4 hours.

Certain aircraft will allow the ship's generator to back charge a GPU. In this manner, Start Pac® can be recharged in the field without an AC source indefinitely.

Batteries have no memory effect and can be recharged at anytime. Made in the USA.
