We Know Your Business

It takes more than insurance knowledge to provide proper aviation coverage in this very specialized field. Our insurance agency is just one part of a full service aviation center with over 67 years of experience. We have the knowledge and experience of the entire MCAC Team. This knowledge works for you as it keeps us in tune with the industry and gives us an insight that you seldom find in other agencies.

As Insurance Brokers we have access to all available markets. This enables us to provide you with the coverage you need at competitive rates and with service that is unmatched in the industry. Please complete and return the Quotation Request which you can download from our web site for a no obligation proposal on your coverage within 30 days of your expiration date. If you are short on time, call us at 800-325-0885 and we will expedite your quote.

As the Satloc Level III Service Center, Mid-Continent can give you upgrades, fixes or the latest units with assurance you have the best to keep you flying during the peak season.

Aging Aircraft

In 68 years of serving agricultural aviation, Mid-Continent has developed the expertise to assist operators with all their needs - super insurance broker services, sales of excellent new and used ag aircraft, a large parts inventory, second to none and worldwide service and application knowledge based on that experience.

A particular concern today, one which is being compounded yearly, is that of aging ag aircraft and their serviceability.

We have learned through experience in our FAA approved repair station DFQR172D that doing the right thing to the best of our ability preempts corner cutting. This is particularly true in servicing aging aircraft. The wing AD's and Service Bulletins for all brands of ag aircraft are becoming more important and costly as years progress.

Structures, components and engines age; corrosion, brittle wiring, structural cracking, and especially deteriorating sealants makes maintenance much more challenging and concurrently much more costly. There is that syndrome

out there which thinks older aircraft should recycle annual time quite easily. The reverse situation obviously exists for older aircraft require patience during the maintenance process and patience is time. Fixing brittle wiring and sealants may also incur other problems. Mid-Continent can be of assistance with older aircraft out of production because of our large inventory of parts and the availability of our experienced parts team to use their many contacts to obtain hard-to-get items. Choose carefully when planning. Our experience can assist in expediting a good, timely repair. Our knowledge and experience are primary objectives.

As a maintenance provider, Mid-Continent has leverage with the manufacturers and vendors which could enable you to get warranty and reduce costs by having a larger user on your side. Mid-Continent will not have all the answers, but we can assist you in informed decision making. Let us be a partner in your maintenance program and long range planning of any kind. Many folks work with us, utilizing our experience to help them make proper decisions for the longer haul.
