APRIL

2018

Stokes Flying Service Earle, AR *Another Member of the Mid-Continent Family*

Stokes Flying Service is our “Hands On Connection” to Ag Aviation. This gives us the opportunity to better understand and solve the problems faced by our industry. Products and methods can get evaluated here before they come to market and then we can tell our customers what works and what doesn’t. It’s the kind of service you’ve come to expect from Mid-Continent.

**Storm
CUTTERS**

These FAA approved STC (#SA01745WI) wire cutters are the newest advancement in wire cutter technology. Three years of research and development have gone into this unique design to create a safer platform for both plane and pilot. The blade has been heat treated to a level of 61 Rockwell Hardness which would be equal to the hardness of a file or chisel. Spacer blocks have been positioned at five points along the blade to increase strength and stabilize the blade in case of a wire strike. Adel clamps positioned along the trailing edge of the landing gear secure the brake line and do away with the standard black zip ties currently used to secure the brake line.

Storm Cutters are now available for every model of Air Tractor from the 300 through the 800 series. This is yet another advancement in safety for the ag aviation industry. Cutters are currently available in stock.
