One More Reason To Own A New Thrush

Built tough – just like the work you do. All Thrush Aircraft feature four massive 4140 steel main spar caps – each is 19.5 feet long, and its two lower spar caps are 1.5" thick. The 700 series main spar is 16 feet long and its two lower spar caps are 1.75" thick. Thrush Aircraft will be with you for the long haul. The 500 series Thrush has a FAA approved fatigue life of 29,000 hours, and the 700 series is 26,000 hours with no mandatory inspections on the wing

spar. And the all-metal airframe construction on all Thrush models is designed and tested to resist fatigue and corrosion. Thrush even puts an anti-corrosive hot linseed oil coating on the interconnected 4130 steel tubes throughout the airframe.

Superior Insurance Coverage

It takes more than insurance knowledge to provide proper aviation coverage in this very specialized field. Our insurance agency is just one part of a full service aviation center with over 64 years of experience. We have the knowledge and experience of the entire MCAC Team. This knowledge works for you as it keeps us in tune with the industry and gives us an insight that you seldom find in other agencies.

As Insurance Brokers we have access to all available markets. This enables us to provide you with the coverage you need at competitive rates with service that is unmatched in the industry. Call us and we will expedite your quote.

Our Mission:

To keep you flying.

Since 1949, Mid-Continent Aircraft has been the leader in Agricultural Aviation by providing a variety of services that exceed our customers' expectations.

We are committed to the advancement of general and agricultural aviation technology.

As we move into each day, we will continue to grow with your business and provide the tools you need to be a success.
